JRC LEGEND IS BACK

Just Right Carbines — Built to Perform, Engineered to Outshoot.

Whether you're at the range or defending your home, Just Right Carbines (JRC) delivers seamless compatibility with your sidearm. Proudly 100% American-made, our pistol-caliber carbines are affordable to shoot, easy to handle, and designed for ambidextrous operation — switch from right- to left-handed setup in minutes, no gunsmith required.

Built solid from the ground up, JRC carbines are known for exceptional accuracy and rugged reliability. They consistently outperform the competition in both precision and durability — trusted by professionals, favored by enthusiasts.

Outfitted with a mil-spec Picatinny rail and threaded barrel, the JR Carbine accepts nearly any AR-style accessory, giving you full control over customization. And thanks to our patented modular design, caliber conversion is fast and simple — just a few parts, a few minutes, and you're mission-ready.

One platform. Multiple calibers. Zero compromise.

Experience the carbine that adapts to you — and outperforms the rest.

G3 Competition Series

G3 COMPETITION

Precision Meets Versatility — The G3 Comp

Built for competition. Trusted in the field. The G3 Comp delivers precision, adaptability, and low-recoil performance in a rugged pistol-caliber carbine platform.

Available in 9mm, .45 ACP, and 10mm, the G3 Comp is engineered for shooters who demand reliability and control—whether you're chasing podium finishes or refining your tactical edge.

- Slim 13" M-LOK Handguard: Lightweight and modular, ready for foregrips, lights, lasers, and more
- Integrated Picatinny Rail: Machined into the receiver for rock-solid optics mounting
- Interchangeable Mag Wells: Seamlessly swap to run Glock, M&P, Citadel CP9, or FMK magazines
- Low Recoil, High Accuracy: Ideal for fast transitions and tight groupings under pressure
- Fully Ambidextrous: Charging handle, extraction port, and controls designed for right- or left-handed shooters

Whether you're customizing for competition or outfitting for mission readiness, the G3 Comp adapts to your needs without compromise.

Ready to personalize. Built to perform.
The G3 Comp isn't just a firearm — it's your competitive advantage.

Spark Series

SPARK TD PCC

Built for the Backcountry — The SPARK Takedown PCC

When the wilderness calls, the SPARK Takedown PCC answers with unmatched versatility and rugged reliability. This modular pistol-caliber carbine is available in 9mm, .45 ACP, and 10mm, giving you the freedom to choose the right caliber for defense, hunting, or remote carry.

Designed to run on double-stack Glock magazines, the SPARK integrates seamlessly with your existing gear—streamlining your kit and reducing weight without sacrificing capability.

- Interchangeable Mag Wells: Easily swap to run Glock, M&P, Citadel CP9, or FMK magazines
- Low Recoil, High Accuracy: Perfect for fast transitions and tight groupings under pressure
- Takedown Design: Compact and travel-ready, ideal for stowing in packs or vehicles
- Modular Platform: Customize with optics, lights, and accessories to match your mission

Whether you're navigating remote terrain or preparing for the unexpected, the SPARK delivers reliable performance in a compact, adaptable package.

Built to move. Engineered to perform.

The SPARK Takedown PCC isn't just a rifle—it's your backcountry advantage.

Starting at:

MSRP \$699.99

Calibers: 9mm, 45ACP and 10mm

SPARK P SYSTEM

SPARK PISTOL SYSTEM

Modular. Field-Ready. No NFA Hassles.

The SPARK Survival System is a 9mm pistol carbine that transitions seamlessly between a 6.5" and 17" threaded barrel — no SBR classification required. Compatible with all sizes of double-stack Glock magazines, it delivers maximum flexibility in a compact footprint.

SPARK features:

- Ambidextrous controls and extraction port for intuitive manipulation
- Compact buffer tube and pistol brace stock for enhanced control
- Quick twist-off barrel system for rapid configuration changes

Lightweight, accurate, adventure-ready, the SPARK is housed in a custom sling pack for streamlined transport and deployment. Whether you're navigating urban environments or heading off-grid, the SPARK delivers uncompromising performance in any scenario.

Starting at:

MSRP \$799.99

Calibers: 9mm

Legend Series

G3 LEGEND

G3 Legend. Built to Perform. Ready for Anything.

The Legend is more than a pistol-caliber carbine—it's your go-to companion for range days, home defense, and everything in between. Chambered in 9mm and proudly American-made, this rugged platform delivers the reliability, adaptability, and precision you expect from Just Right Carbines.

Outfitted with a 17" threaded barrel and an 7.5" machined Picatinny quadrail, the Legend is engineered for customization. Mount optics, lights, lasers, or grips with ease—standard AR accessories lock in tight and stay put. Whether you're dialing in for accuracy or building out for tactical advantage, the Legend gives you the freedom to configure your setup your way.

- Ambidextrous by design—switch from right- to left-handed operation without a gunsmith
- Compatible with double-stack Glock magazines for seamless integration and fast reloads
- Low recoil and intuitive ergonomics make it a natural fit for shooters of all levels
- Mil-spec durability meets real-world versatility

Starting at:

MSRP \$749.99

Calibers: 9mm, 45ACP and 10mm

LEGEND P QUAD

The Legend P Quad is more than a pistol-caliber carbine—it's a mission-ready platform engineered for shooters who demand reliability, adaptability, and American-made performance. Whether you're training at the range, securing your home, or building out a tactical kit, the G3 Legend delivers the confidence and control you need.

Chambered in 9mm, this rugged carbine is built on the proven Just Right Carbines platform and features a 10" threaded barrel—perfect for suppressor integration or muzzle device customization. At the heart of its versatility is a 7.5" machined Picatinny quad rail, offering rock-solid mounting for optics, lights, lasers, vertical grips, and other mission-critical accessories.

- 10" Threaded Barrel: Suppressor-ready and built for consistent accuracy
- 7.5" Machined Quad Rail: Full Picatinny coverage for maximum accessory flexibility
- AR-Compatible Furniture: Customize with your preferred grips, stocks, and components
- Ambidextrous Charging Handle & Ejection Port: Designed for right- or left-handed shooters
- Double-Stack Glock Mag Compatible: Seamlessly integrates with your existing loadout
- Proudly Made in the USA: Built with precision and pride for serious shooters

Whether you're dialing in for tight groupings or outfitting for real-world readiness, the G3 Legend P Quad gives you the freedom to configure your setup your way—without compromise.

Battlearms Series

JRC BATTLEARMS

Introducing the JRC BATTLEARMS™ .410 and .223 Wylde Series — built for durability, performance, and real-world reliability.

Engineered for tough use, each firearm features a forged WORKHORSE® 7075-T6 aircraft-grade aluminum receiver paired with a free-float rail handguard and M-LOK® attachment system. The full-length Picatinny top rail includes our signature notch cut for a seamless match with the upper receiver — form meets function.

Performance is uncompromising. Every BATTLEARMS firearm is equipped with a 4150 chrome-moly steel barrel finished in black nitride for enhanced accuracy and longevity. Each barrel is precisely head-spaced to a 9310 steel bolt and 8620 black nitride carrier, delivering exceptional reliability and simplified maintenance.

Whether for duty or defense, the JRC BATTLEARMS series offers unmatched value and rugged dependability. Experience the difference — built to perform when it matters most.
